PROJECT DOCUMENTATION

STORE MANAGER-KEEP TRACK OF INVENTORY

1.INTRODUCTION

- ❖ PROJECT TITLE:STORE MANAGER-KEEP TRACK OF INVENTORY
- **♦ TEAM ID:**NM2025TMID37832
- * TEAM LEADER: G.KIRUTHIGA
- MAIL ID: kiruthigovindh@gmail.com

TEAM MEMBERS:

NAME: ILAKKIYA.P.A

MAIL ID: ilakkiyapa@gmail.com
NAME: DEEPIKA SHREE. R

MAIL ID: deepikashreerajkumar@gmail.com

NAME:NANDHINI.A

MAIL ID: nandhinianbalagan8906@gmail.com

2.PROJECT OVERVIEW

PURPOSE:

1.ENHANCE INVENTORY CONTROL: Provide real-time visiliablity into inventory: level and movement

2.STOCK LEVEL: Enable business to maintain stock level, reducing stockout and overstocking.

FEATURES:

1.PROJECT POSTING:

- Allows store owners to post tasks/projects with details like title, description, budget, timeline, and required skills.
- Option to set visibility, attach files, and invite specific bidders.

2. BIDDING SYSTEM:

- Freelancers can place bids with proposals, budgets, and timelines.
- Option to view competitor bids (optional), modify/delete bids, and receive bid status updates.

3. SECURE CHAT SYSTEM:

- Real-time messaging with project-specific chat threads.
- End-to-end encryption for privacy, file sharing, and message history with read receipts.

4. FEEDBACK AND REVIEW SYSTEM:

- Users can rate each other (1-5 stars) and leave written reviews on communication, quality, and timeliness.
- Admins can moderate reviews for abusive content.

5. ADMIN CONTROL PANEL:

- Centralized backend to manage users, projects, bids, and disputes.
- Analytics dashboard, user/project moderation, review management, and payment system controls.

3.ARCHITECTURE

1.FRONTEND

- Tech Stack: HTML, CSS, JavaScript, React/Vue/Angular for dynamic Ul.
- Features:
 - Dashboard, project posting, bidding, real-time chat, profile management.
 - Responsive UI with state management (Redux/Context API).
 - HTTP requests handled via Axios/Fetch API.

2.BACKEND:

 Tech Stack: Node.js + Express (or Python/Django) for handling logic and APIs.

• Features:

- Authentication: JWT for secure login and role-based access control.
- APIs: Project posting, bid management, chat, reviews.
- Real-time chat via WebSockets.
- Payment Integration (Stripe/PayPal) for transactions.

o Security: Input validation, rate limiting, logging.

3.DATABASE:

• Tech Stack: PostgreSQL/MySQL (relational DB).

Tables:

Users: Store owners, freelancers, admins.

• Projects & Bids: Store project details and bids.

Messages: Store chat history.

• Reviews: Rating system for users.

o Payments: Handle escrow and payouts.

4.SETUP INSTRUCTION:

PREREQUISITES:

1. Node.js & npm: Install Node.js

2. Database: PostgreSQL or MySQL.

3. Code Editor: Install VS Code.

4. Git: Install Git.

5. Postman (Optional): For testing APIs.

5.AUTHENTICATION:

The authentication system ensures that only authorized store managers can access the management dashboard. Managers must log in using a registered email and password. Passwords are securely stored using encryption (e.g., bcrypt). Upon successful login, a session or token (e.g., JWT) is generated to maintain secure access. Role-based access control restricts features to managers only, protecting sensitive operations such as inventory updates, employee oversight, and sales tracking.

6.USER INTERFACE:

1.Dashboard Overview:

Displays key metrics (sales, inventory, orders, etc.) Quick summary of daily/weekly performance

2. Navigation Panel:

Side or top menu for easy access to modules Modules include Products, Orders, Employees, Reports, Settings

3. Product Management:

Add, edit, or delete products View stock levels and product details

4. Order Management:

View ongoing, completed, or cancelled orders Update order status and track deliveries

5. Employee Management:

Add or remove staff accounts
Assign roles and monitor staff activity

7.ROUTING:

Frontend Routes (User Interface / React/Vue/Angular)

1. /login

Store manager login page

2. /dashboard

Main dashboard showing overview (sales, inventory, etc.)

3. /products

View and manage all products

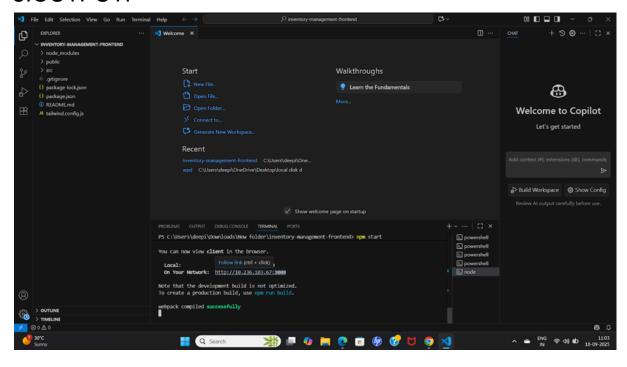

4. /products/add

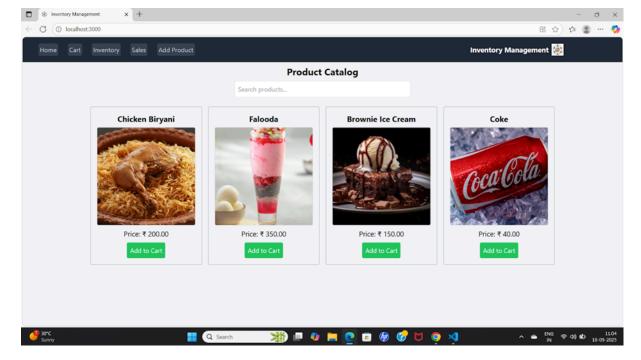

Add a new product

5. /products/edit/:id

Edit an existing product (by ID)

8.OUTPUT:

9.DEMO LINK:

https://drive.google.com/file/d/1sxPeZ8ujaxtU1irE6nhTLdF2l3Udw6k9/view?usp=drive_link

10.PRODUCT ITEMS:

CHICKEN BRIYANI:200/-

FALOODA:350/-

BROWNIE WITH ICE CREAM:150/-

COKE:40/-
